

Daciano Dacosta

FROM SKETCH TO PROJECT

Since 2013, the Atelier Daciano da Costa Society has taken on a new management with the aim of keeping alive the memory of designer, architect and teacher Daciano da Costa, through actions that aim to enhance, publicize and expand his work.

Professionals, students, and all those who are in one way or another connected to the arts, are our top priority to build a community that is the engine for the success of this mission..

Present the work to professionals and jointly evaluate Daciano da Costa's design in their interior architecture projects, coexisting in new environments.

The Casa da Música project (2015) is the example we want to replicate.

"Daciano in the hands of the designers."

Architect Rem Koolhaas has selected furniture designed by Daciano da Costa for the interiors of Casa da Música.

It is possible to study for the author projects the reissue of models belonging to families of objects by Daciano da Costa.

FROM ORIGINALS TO REISSUES

Alvor chair designed for the Casa da Música cafeteria.

As part of Casa da Música the architectural project in Porto, the Dutch architect Rem Koolhaas, chooses from Daciano da Costa work, furniture designed for multiple previous works such as the Teatro Villaret (1964-1965), the Hotel Alvor Praia (1966-1968), the Fundação Calouste Gulbenkian, the Hotel Altis (1971-1974), o Centro Cultural de Belém (1990-1992) and the Coliseu dos Recreios (1993-1994).

When inhabiting a new space, the reissues reappear some in the original version and some adapted. By way of example, the *Alvor* chair appears in a full wood version; the *Boroa 2* armchair appears in new colors.

CENTRE GEORGES POMPIDOU

In 2015, the *Boroa 2* armchair (Centro Cultural de Belém version), together with its respective technical drawings and sketches, incorporates the permanent collection of the Center Georges Pompidou National Museum of Modern Art in Paris.
